## ARCTIC PROJECT TEAM WINS THE 7TH « COURSE EN COURS » COMPETITION

On June 7th, the Ecole Polytechnique hosted the final of "Course en Cours", a competition based on Formula 1 involving more than XXX middle and high school students, their teachers and university students from XXX academies in France. The final capped a year of discovery for the young students, who designed and built their own scale models with the advice of Renault engineers. Through Course en Cours, Renault reaffirms its commitment to young people, helping them to find out about automotive professions and enter the job market.

This year, it's the Arctic Project Team, from Victor Duruy High school in Mont de Marsan who won the seventh edition of "Course en Cours".

Remarkable too, the provision of two middle schools that are on the podium, especially the 3rd place of the "Renolution" team from Abel Minard du tonnerre College and his revival of the 4CV.
