RENAULT CO-FOUND'S 'ANTHROPOLIS' CHAIR: PUTTING PEOPLE AT THE CENTRE OF NEW SERVICES AND NEW MOBILITY SOLUTIONS

SystemX, CentraleSupélec, Renault and four other industrial partners have established the 'Anthropolis' Research and Teaching Chair for four years. The goal is to develop innovative eco-friendly solutions for sustainable urban and peri-urban development for the benefit of both citizens and local authorities. These systems and services will be designed around people.

"Renault wants to be an integral part of users' changing mobility needs now that systems are becoming increasingly complex and connected. The Research Department has co-founded this research chair in a spirit of openness and cooperation in order to guide our business model decisions for the mobility solutions of the future," commented Nadine Leclair, Senior Vice President, Expert Fellow of Groupe Renault.
